Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the space in the light emitting member including space for an auxiliary light source must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 7 is objected to because of the following informalities: It recites "the light emitting member includes a space for an auxiliary power source". The specification recites only "and it contains power generating means (single or multiple power sources, including regular and rechargeable batteries, an AA battery B, or one or more replacement batteries) "there is no mention of a space for an auxiliary power source. Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4,6-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang (6,186,638)

3. Taggart discloses a flashlight apparatus comprising a base member a light emitting member and a support member the base member the light emitting member and the support member being pivotally connected to each other (54,34,fig. 2); the base member includes a pocket sized multi function tool (12); the support member is pivotally mounted to the utility tool(fig 2); the base member and the light emitting member are disposed in the end to end relation and pivotally mounted to one another(figs 1-2);the

light emitting member includes a light source a power source to the light source and a housing for containing the light source and the power source (40); the light emitting member includes a space for an auxiliary power source; the support member includes a plurality of support segments pivotally connected to the base member (56); a base member a light emitting member disposed in end to end relation with the base member and pivotally connected to the base member and a support member pivotally connected to the base member (figs 1-2).

Allowable Subject Matter

4. Claims 15-30 are allowed.
5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not teach in combination of the structural elements in claims 15 and 22 including a pair of support wires attached to the first end of the channel base member, the support wires having a projected position and folded position.
